

# Issue Report

Site quality report for https://stretchproject.org/ produced on May 2, 2025.

Overall Quality		57 pages with quality issues
Errors		9 pages with broken links or other errors
Accessibility		53 pages with accessibility problems
Compatibility		53 pages with browser specific issues
Search		42 pages with search engine issues
Standards		54 pages have W3C standards issues
Usability		26 pages with usability issues
Totals		170 URLs checked

## Errors

This section shows site quality issues, including broken links and server mis-configurations.

### Priority 1

6 issues on 9 pages

- This link is broken. The link target could not be loaded due to an HTTP error.  
This is sometimes a temporary problem, but if it persists it indicates a serious problem on your web server.  
[Broken Link HTTP](#)  
Broken link: <http://oro.open.ac.uk/53032/4/53032.pdf> 503 Server Unavailable  
<https://stretchproject.org/published-work/index.html> line 262  
Broken link: <https://x.com/bp5> 400 Bad Request  
<https://stretchproject.org/team/index.html> line 158  
Broken link: <https://x.com/bnuseibeh> 400 Bad Request  
<https://stretchproject.org/team/index.html> line 158
- This link is broken. The SSL certificate on the target server has expired or is invalid.  
Check the certificate properties in a web browser. If the SSL certificate has expired then it should be renewed. If the issuer is not recognized then a test certificate has been used, and it should be replaced by one from a certificate authority like Comodo or LetsEncrypt.  
Broken Link  
Broken link: <https://stem-ts.open.ac.uk/> | SSL report: (click for report)  
<https://stretchproject.org/sortsite-broken-404-probe-a3e453d567.none> line 71  
Broken link: <https://www.stretchproject.org/> | SSL report: (click for report)  
<https://stretchproject.org/welcome-to-the-stretch-project/index.html> line 163
- This link is broken. The target web server is unreachable or no longer running at this URL.  
This can be a temporary problem, but also happens if the destination site is no longer operating or behind a firewall. Most staging and development servers are protected by firewalls. If the site is still operating raise the issue with your IT Department or ISP.  
Broken Link  
Broken link: <https://open.ac.uk/> <https://stretchproject.org/sortsite-broken-404-probe-a3e453d567.none> line 82

- This link returns a 403 Forbidden HTTP status code.

Web servers return this code when access is denied to a URL.

- This site returns "soft 404" errors for missing pages, which means a success status code is returned for non-existent pages. This means some broken links cannot be detected on this site.

Ensure the 404 handler for this site returns HTTP status code 404 for non-existent pages.

#### [Server Configuration](#)

The following status is returned for non-existent pages: 200 OK.

<https://stretchproject.org/sortsite-broken-404-probe-a3e453d567.none> line 1

## Accessibility

This section shows accessibility issues, indicating problems for older users, people with disabilities or accessibility needs. Automated testing cannot detect all accessibility issues, so should be used alongside human testing.

### Level A

5 issues on 20 pages

- Identify row and column headers in data tables using `th` elements, and mark layout tables with `role=presentation`.

Data tables allow screen reader users to understand column and row relationships. Layout tables read cells as a series of unrelated paragraphs with no tabular structure. Without `th` or `role`, screen readers apply heuristics to decide whether a table is a layout table or data table. These heuristics vary greatly between screen readers, and are affected by browser being used, window size, and font size (so the outcome is very unpredictable without `th` or `role`). If a data table has headers marked up using `td`, then change these to `th`. If a data table has no headers, add `th` elements describing each row and/or column. If the table is only used for layout add `role=presentation` to the `table` element.

- JAWS Reading: Treats tables without `th` and `role` as layout tables if the table contains cells above or below certain pixel sizes. This measurement is affected by browser window size, browser font size, and the browser used.
- NVDA Reading: Applies a layout table heuristic to tables without `th` and `role` which varies depending on the browser used and on the window size in some circumstances.
- VoiceOver Reading: Uses a sophisticated heuristic on tables without `th` and `role`, which is similar (but not identical) to the heuristic used by NVDA with Firefox.

line 159 163

<https://stretchproject.org/welcome-to-the-stretch-project/index.html> line 163

- Indicating links using only a text color change does not work for color-blind users.

Remove the `text-decoration:none` property from your link styles, or add other style attributes in addition to color changes to make links visible to people without color vision. If the non-color cue only happens when the mouse hovers over the link or when the link receives focus, it is still a failure.

<https://stretchproject.org/welcome-to-the-stretch-project/index.html> line 163

- Link uses general text like 'Click Here' with no surrounding text explaining link purpose.

Screen reader users use text around links to help understand what the link does. If the link text is very general, and there's no surrounding text, there's no way to work out what the link does. Either use a descriptive link label (which helps all users) or add an `aria-label` or `aria-describedby` to the link (which helps screen reader users).

- The CSS outline or border style on this element makes it difficult or impossible to see the link focus outline.

Do not remove the default outline style, and change any border styles to avoid obscuring the focus outline around focusable elements. See :focus-visible for more information.

- Chrome (obscures the focus indicator on links, buttons, dropdowns and range controls)
- Firefox (obscures the focus indicator on links)

- User interface controls must have a contrast ratio of at least 3:1 against adjacent colors.

If the control has a visible edge, make sure this has sufficient contrast against the area outside the control.

## Level AAA

5 issues on 53 pages

- Avoid specifying a new window as the target of a link with `target=_blank`.

Displaying new windows without warning can be very confusing to non-sighted and mobile users. Some screen readers and mobile devices give very little indication a new tab or window has opened. If you cannot avoid displaying a new window, insert an "opens in a new window" warning into the link text or add the warning to the link using a `title` attribute or `aria-describedby` attribute.

...
```

- Link uses general text like 'Click Here' which doesn't explain link purpose.

Screen reader users often tab from one link to the next, or use the 'Next Link' command. Moving between links labelled 'click here' sounds like 'Click here, tab, click here, tab, click here'. Change the link text, or add an `aria-label`, so the link makes sense when read without the surrounding text.

# Compatibility

This section shows pages that exhibit browser-specific behavior, or trigger browser bugs.

## Priority 1

1 issues on 53 pages

- Most browsers display a security warning when a secure `https:` web page includes `http:` content.

Modern browsers will not display, or ignore, the `http:` content. To fix this: use relative URL paths `../images/file.png`; or full URL paths `/images/file.png`; or absolute https URLs `https://example.com/images/file.png`.

## Search

This section shows search engine guideline violations, and pages that don't comply with search optimization best practices.

### Priority 3

2 issues on 42 pages

- 🟡 No meta description tag found. Use a description tag that accurately describes the contents of a web page.

A well-written meta description attracts more clicks in search results than an irrelevant or missing description.

[Yahoo](#) [Google](#) [Bing](#)

<https://stretchproject.org/published-work/index.html> line 1

<https://stretchproject.org/team/index.html> line 1

- 🟡 Using `rel=nofollow` on internal links dilutes PageRank flow through your site.

PageRank is distributed between all outgoing links on a page (including the nofollow links), so PageRank flowing to internal nofollow links vanishes.

## Informative

These messages are for information only and do not indicate errors or conformance problems.

- No search keywords are set in SortSite, so no keyword optimization rules have been run. If you want to check keyword optimization, set the keywords using the Scan Options command.

Best Practice

<https://stretchproject.org/> line 1

# Standards

This section shows pages that do not comply with W3C standards.

## Priority 1

2 issues on 53 pages

- A document must not include both a `meta` element with an `http-equiv` attribute whose value is `content-type`, and a `meta` element with a `charset` attribute.

# Usability

This section shows general usability issues, indicating navigation problems for all users.

## Priority 1

1 issues on 12 pages

- Users should be able to quickly look at each link and tell where it goes.

Don't use generic link labels like "click here" or "read more" because they're hard to tell apart when users scan a page.

### Usability.gov 10:1

- Omitting `img width` or `height` attributes makes the page layout jump about as images load.

This makes the page very hard to read or click while it's loading. Fix by adding width and height attributes to the `img` tag matching the image dimensions. In responsive layouts, specifying `width` and `height` prevents layout jumping because the browser can pre-calculate the final image size when CSS like this is used: `img { max-width: 100%; height: auto }`

## Priority 3

2 issues on 4 pages

🕒 Use at least a 12-point font on all web pages.

- `<p style="font-size: 11pt;" >`
- `<p style="font-size: 15px;" >`
- `<p style="font-size: small;" >`
- `<font size="2" >`
- `<font size="-1" >`

🕒 Use italic text sparingly - for one or two words or a short phrase.

Keep runs of styled text to less than 70 characters. When used well, styled text draws attention to important words, but also decreases reading speed by almost twenty percent.
